RESULT ANALYSIS

Result Analysis

Your answer: d

Correct answer: Answer: (c) For sending the data from an application to another application

Explanation: A content provider is used to share information between Android applications

5) Which of the following android component displays the part of an activity on screen?

Your answer: d

Correct answer: Answer: (d) Fragment

Explanation: Android Fragment is the part of activity; it is also known as sub-activity. There can be more than one fragment in an activity. Fragments represent multiple screens inside one activity.

6) Which of the following is the parent class of Activity?

Your answer: d

Correct answer: Answer: (c) ContextThemeWrapper

Explanation: The android Activity is the subclass of ContextThemeWrapper class. Android Activity Lifecycle is controlled by 7 methods of android.app.Activity class. An activity is a single screen in android. It is like a window or frame of Java.
